← This Keyword in Java →

This Keyword

[•]

In java, this keyword is used to refer to the current object inside a method or a constructor.

[•]

Mostly use this keyword to remove any Ambiguity in Variable Names.

[•]

We can also use this keyword to invoke methods of current class or to invoke a constructor of the current class.

Ex:

```
class Complex
{
    int a, b;

    public Complex ( int a, int b)
    {
        this.a = a;
        this.b = b;
    }
}
```
